Drugwolf

Crime In Stereo

You called to say you're going away
Speak in code, our voices shake
The pigs are much more clever
Than we ever would've thought
You call to say they're on their way
The lines are tapped
Nothing here is safe
Just get out of Gotham
All these cops want to bring us down.

Open up your mouth and sing it out
Create a good space for the sound (I swear I swore you off, forever)
Then you come around
This love (Down...)
This love
This love is going to drag us down.

Clicks betray, the call's been traced
Lines collapse the static breaks
Connection left us severed
I stretch my limbs across

You call to say the anchor weighs
The ocean down to control the waves
I'm getting out of Gotham
All these cops are starting to bring me down.

Open up your mouth and sing it out
Create a good space for the sound (I swear I swore you off, forever)
Then you come around
This love (Down...)
This love
This love's going to drag us down.

Better off alone, together
Better off alone, together
Better off alone, together
All this getting high brings me down

Open up your mouth and sing it out
Create a good space for the sound (I swear I swore you off, forever)
Then you come around
This love (Down...)
This love
This love's going to drag us down.

This love...
