

Set off neutron bomb!  
Annihilation for the new beginning  
Destroy pyode amedha  
Forefathers' death for development of new life

When your feeble organisms are exposed  
To a lethal dose of prompt neutrons  
You are finally aware of what us coming

As molecules disintegrate into ionised particles  
So your world falls to pieces  
That which you had not taken notice of  
Will accompany your dreams of freedom

Neuthrone era -- white hell  
Frozen earth, where are your greens and blues?  
Icy coffin, rotating in space  
A warning sign for the weaker

We watch as the dirt is washed out  
You are caught in the whirlpool  
Of the dance of death  
The icy water is a new baptism to purify the earth

Turn on the neuthrone climate control systems  
Prepare for acclimation

Blessed are those who will not survive  
As the future of those who do  
Is in the colours of death
