

Turn You On

Cris Cab

Ah, turn you on, yeah, yeah

Why are you still here remind me
You think we'll have more fun here, not likely
So many place that we couldn't be
So many places girl
I see your face when I see my back seat
And now your dimples got me smiling
Laughing while we're driving
The time is now arriving
Pull over to the side and ooh
Turn you on

I wanna know wanna know what turns you on
I wanna know wanna know, the night is young
I wanna know wanna know what turns you on
I wanna know wanna know, the night is young

When we finally get to your home
You tell me that your parents are gone
Your dad really thinks you're an angel
I do too that's why I'm here to entertain you
It's on tonight, girl don't be shy
Your body's telling me you want it
To feel that surge, feel in your urge
The whole neighborhood knows you're home
And now the flame has been ignited
And you can't fight it, love the way I do it girl
You get so excited, oho, turn it on

I wanna know wanna know what turns you on
I wanna know wanna know, the night is young
I wanna know wanna know what turns you on
I wanna know wanna know, the night is young

Times I'm feeling the way you rock ...give up
Whisper softly in my ear that really drives me wild
Like the night we're young, I wanna have fun
Just please don't tell my daddy bout the things we done

Girl I make you hit the right ...hope on up the night stick
And me turn you ready turn on like a light switch
From the right itch, gonna make you like this
Hop upon the...reunite this...turn you on
... from dust till dawn... I need the keys to your heart
... is the ... to start

I wanna know wanna know what turns you on
Do you really wanna know, sing that song for me
I wanna know wanna know, the night is young
It's all .. do you really wanna know, turning me on
I wanna know wanna know what turns you on
Turning me on, you turning me on
You really really turning me on, turning me on.
