

# Disappear

Crobot

When the sky's not clear  
The sun is still there  
Seeds are planted  
In times of fear

Tastes so bittersweet  
This dirty water  
Keeps us complete  
The things we overcome  
Never kill our soul

When the leaves start to wither  
The soil is soaked in decay

But love, love will overcome  
And fear doesn't live here  
Even though I'm not there  
You know I never disappear  
Never disappear  
Never

Don't let your pretty head worry  
They try to keep you scared  
And if your face down in the dirt  
Then your spirit's prepared

You can't fly if you don't pay the price  
But whole time they weigh you down with lies

Cause love, love will overcome  
And fear doesn't live here  
Even though I'm not there  
You know I never disappear  
Never disappear  
Never

Freedom has always been here  
Since the first day we inhaled  
When they make you lost  
Yeah they've already won

They've already won

And we'll never let them

Cause love, love will overcome  
And fear doesn't live here  
Even though I'm not there  
You know I never disappear  
Never disappear  
Never
