Set You Free

Crobot

It's dark and I'm lost
But I'll keep waiting here beside you
If this pain is the cost
There's no light that's here to follow

What have we done
To become so numb?

I'll give you my faith just so you believe
Run through the darkness so you can see
I'll set you free

It's late and my shadow's been blinded by the moonlight
The taste of the unknown will eat you from the inside

What have we done
To become so numb?

I'll give you my faith just so you believe
Run through the darkness so you can see
I'll set you free

I'll keep falling til I land on you
We can sink together somewhere new

It's dark and I'm lost
And there's no light that's here to follow

What have we done
To become so numb?

I'll give you my faith just so you believe
Run through the darkness so you can see
I'll set you free
I'll set you free
