The Necromancer

Crobot

In the wake of the morning
The breaking of day
The land of the deadites lies just this way

Their souls have arisen
An army awake
The hand of the mage enslaves

All hail! The Necromancer
All hail, the Necromancer

The killed get up and kill

In the light of the moon
The breath of the night
Bloody mist on the battlefield
This war ends tonight

Life of the lifeless we'll try and take
Pillage one and all, burn 'em at the stake

All hail! The Necromancer
All hail, the Necromancer

The killed get up and kill
The killed get up and kill

What does it take to slay the slayed?
How do you hunt the hunted?

All hail! The Necromancer
All hail, the Necromancer

The killed get up and kill
The killed get up and kill
