

Without Wings

Crobot

Crashing down to Earth
I fell among the evergreens
The snow to catch my fall
And keep my sins from spoiling

The fear that fuels my haste
Can hear the horses galloping
To drag me to my fate
Unholy gates

Palace of the king
It calls my name, don't be afraid
But they're coming for me

All of these black vultures circling
Death's on its way
Wicked are the wolves that keep following
Bloody betrayal

Hellfire
Burning beneath your feet
With evil eyes
We're searching the Earth for the angels without wings

Into the darkness we run through the night
With witches we ride
Show us the world, ravens take to the skies
They cannot hide

Hellfire
Burning beneath your feet
With evil eyes
We're searching the Earth for the angels without wings

Cut off my wings, tear me from the sky
Rip out my heart but I will never die

Hellfire
Burning beneath your feet
With evil eyes
We're searching the Earth for the angels without wings
Without wings
Without wings
