

Pain, love, hate you feel is now become automatic  
Game, vision, world you love  
Is turning you into hell

Species  
We now open the door  
Species  
New era born with the noise  
Species  
Leave all the past for the war  
Species  
The sickness has crawled into your vein

What drugs you off is the fucking digital parasite  
You have sold your soul for goddamn spotlight  
Step in my mind and then capture you aye  
How would you cut all the chain  
I will go hard and then changing the game  
You can not fight with the pain

Can you feel the parasite  
It comes with the noise  
Feel it injected in your vein  
Alive on the inside  
You never know how to fight with the pain  
Let me wake you, open your eyes  
We live in their voice

Pain, love, hate you feel is now become automatic  
Game, vision, world you love  
Is turning you into hell

Species  
We now open the door  
Species  
New era born with the noise  
Species  
Leave all the past for the war  
Species  
The sickness has crawled into your vein
