

In the shadow of the light, searching back into my mind  
For the moments we made  
Coming home

We are always on the run  
Race begun under the midnight sun  
Feel the faith, make or break  
Won't stop until it's done  
I remember when the story changed  
And it's sometimes hard to stay the same  
Our seven souls, with seven dreams  
We made a great escape

Promise you someday, gonna find a way back home  
(Find a way back home)

Always and never, forever  
We're coming home, we're coming home  
We are, we are, we're always on the edge  
Together not alone  
Still got the world to see  
(We're coming home, we're coming home)  
Got a piece of your heart with me  
(We're coming home, we're coming home)  
I just hope when I'm there I'll know

In the shadow of the light, searching back into my mind  
For the moments we made  
Every milestone for us defined  
The seconds that the stars aligned  
I can't forget, I won't forget  
The ones I left behind

Promise you someday, gonna find a way back home  
(Find a way back home)

Always and never, forever  
We're coming home, we're coming home  
We are, we are, we're always on the edge  
Together not alone  
Still got the world to see  
(We're coming home, we're coming home)  
Got a piece of your heart with me  
(We're coming home, we're coming home)  
I just hope when I'm there I'll know

Home
