

Save me from this light You lost your sense of feelings And you
say goodbye I'll go back when you're falling down

Will you leave far from me Is a prisoner We can't refuse to sta
y Remind yourself I show you what you have given me Will you te
ll me this? Save me from the truth again Time is passing by I k
now the world brings you down

Show me the way you're calling me But we can't refuse to stay i
n your womb Why you try to say goodbye Fall to the same mistake
s She does not make a sound Against the sorrow

Why do you choose the way? The darkness of your heart inside Th
is is inevitable So why don't you trust yourself?

We are, we are existence The day that you wasted Will never mak
e you smile again When you fall I just stand aside You can't re
solve Though make one step forward The burden brings you back I
t brings you down

Why you fall down and feel the fear It won't save your soul You
better set it in motion Why you fall down and feel the fear It
won't save your soul You better set it in motion Why you fall
down and feel the fear It won't save your soul You better set t
o be back Yeah to be back Yeah!

Shake your brain turn upside down Why you fall down and feel th
e fear It won't save your soul You better set it in motion This
is not time to listen When you're falling down We are back

Shake your brain turn upside down Will we go back to start agai
n?

We are, we are existence The day that you wasted Will never mak
e you smile again When you fall I just stand aside You can't re
solve though make one step forward The burden brings you back I
t brings you down It brings you down The burden brings you back
It brings you down Yeah!
