

Truth Of Insanity

Crossfaith

Burn burn because it's too late
Can't listen to your sound
Burn burn we set it all
We're gonna burn it to the ground

Look up the castle of contradiction
In the dark red sky
They're looking down on me
Like we have a empty mind
Higher people frame the minority
We call it a truth of insanity
Ignore the words lies filled with vanity
We won't forgive

I will be the fire, flame the enemy
And we lit the liar
Ashes to the cemetery
Just follow me, just follow me, just follow me and blaze it out
Burn it down, burn it down
We burn it to the ground

Now let me get them all
So many reasons, too much to follow
Divided we fall
Now dust is covered all around the city

Your city is covered by the smoke...
Set it off!

When someone falls then another one will rise
You fucked it all, you were getting high now low
It's your turn to be rejected
It's your turn to be the one gets blown

Burn burn because it's too late
Can't listen to your sound
Burn burn we set it all
You'll never bring me down

Burn burn because it's too late
Can't listen to your sound
Burn burn we set it all
We're gonna burn it to the ground

I will be the fire, flame the enemy
And we lit the liar
Ashes to the cemetery
Just follow me, just follow me, just follow me and blaze it out
Burn it down, burn it down
We burn it to the ground
We burn it down
I will be the fire, flame the enemy
And we lit the liar
I will burn burn burn
Just follow me, just follow me, just follow me and blaze it out
Burn it down, burn it down
We burn it to the ground
