

I Feel Possessed

Crowded House

She said I could never do that
But I know you can, you are in my dream
We are one person, not two of a kind
And what was mine is now in your possession
I could feel you underneath my skin
As the wind rushed in, sent the kitchen table crashing
She said, nobody move, or I'll bring the house down

I hardly know which way is up
Or which way down
People are strange,
God only knows
I feel possessed when you come round

It was one of those times wished
I had a camera on me
Six foot off the ground
Well, I know how that sounds
Look above you and beyond me too
That kind of view don't need an explanation
I'm not lying, not asking for anything
I just want to be there when it happens again

I hardly know which way is up
Or which way down
People are strange
God only knows
I feel possessed when you come round

Whenever you invade my home
Everything I know flies out the window
It's above you and beyond me too
I don't want an explanation
But I'll be there when you bring the house down

I hardly know which way is up
Or which way down
People are strange
God only knows
I feel possessed when you come round
People are strange
I feel possessed when you come round
