

Stare Me Out

Crowded House

There's a lizard crawling from a hole in the ground
He could see us coming every which way around
And his eyes were bugging
All the kissing and hugging and the tears coming down
You can stare me out

He said to me
You're smiling upon this earth
I told him to do anything you want
Well, life is yours to own

There's a praying mantis on the piano now
He's looking straight at me like he's digging the sound
Now he's moving his head and all the lights going red
I'm sure I've seen him before
I've been through his door
You can stare me out

You're holding me so tight
You're telling me it's alright
It's like a restaurant
Where you can abuse the waiters
Harmonize with your mum
Do it with your apron on

You could always stare me out
All this time you can stare me out

Always stare me out
Always stare me out
Always stare me out
Always stare me out
Alright
Alright
Woo hoo

B Flat

Mark your head flop
