

# For Us All

Cruadalach

Damn!  
This is the world disaster for us all!  
Life just sucks when you don't live it up  
Break the rules to enjoy!  
Let's do it now!

Get us through this  
Searching reasons why  
We are on our knees  
Apathy moves society  
We are falling down  
We are breaking down, down, down!

Fate! Let's take the night off, for us all!  
It's easy to lose yourself I know  
Don't fake to live it will kill you though  
Let's live it now!

Get us through this  
Searching reasons why  
We are on our knees  
Apathy moves society  
We are falling down  
We are breaking down, down, down!  
Hear our mute voice  
We'd no choice  
We're falling down

Come on!  
Music is a kind of therapy!  
It's for us all. Open your eyes and start to live!  
Let's go!  
Take the night off!  
Refuse all the hate together!  
You know how to live, share it with your mates together!

Come on!  
Music is for everyone of us!  
It's for us all. Open your eyes and start to live!  
Let's go!  
Take the night off!  
Refuse all the hate together!  
You know how to live, share it with your mates together!

Get us through this  
We are on our knees  
We are falling down  
Hear our mute voice  
We'd no choice  
We're falling down

Now, it's been the while  
Not just tonight  
We still believe, that the time has come

We will never fall back, we will never step aside  
We will never more cling on the past,

Cause wind's too fast  
We will never fall back, we will never step aside  
We will never more cling to the past,  
Cause the wind's too fast  
We will never fall back, we will never step aside
