

# Rhythm of our Blood

Cruadalach

Secret fire in our hearts  
is leading us through earthy time  
Eyes staring at distant stars  
Legs are earthbound to Earth's soil  
Take the torch and light the night  
From solstice to equinox  
From our birth to the stardust  
That is rhythm of our blood

Mysteries, mysteries, never forget your dreams  
Till you have head in clouds you can feel breeze  
From first leaves to the fruits you can see sacred trail  
All grows and dies in circle of Universe

Feel the pulse  
In my veins  
Melting blood destined to breath with Earth!  
What a fate  
Miracle  
That we're all children of one great mother!

Feel the pulse  
In my veins  
Melting blood destined to breath with Earth!  
What a fate  
Miracle  
That we're all children of one great mother!

When you understand immortality of soul  
You won't feel fear from anybody anymore  
When you understand that gods show the way  
There's no more darkness, just dreams and fairy-tales

Mysteries, mysteries, never forget your dreams  
Till you have head in clouds you can feel breeze  
From first leaves to the fruits you can see sacred trail  
All grows and dies in circle of Universe

Come with me, come with me to these ancient times  
When we danced with high elves and honoured the Gods  
Come on with me, don't afraid now, you're one of us  
What you hear now, what you feel, it's rhythm of blood

When you understand immortality of soul  
You won't feel fear from anybody anymore  
When you understand that gods show the way  
There's no more darkness, just dreams and fairy-tales

Take the torch and light the night  
From solstice to equinox  
From our birth to the stardust  
That is rhythm of our blood

When you understand immortality of soul  
You won't feel fear from anybody anymore  
When you understand that gods show the way  
There's no more darkness, just dreams and fairy-tales
