

The Bug

Crumb

We caught a fly
Reminds me of when I was
Some tiny child runs behind
But I can never see their eyes
Lost track of time
Get older but not wiser
The years go by
And the bug stays on my mind

It's always on my mind
It's just always on my mind
It's just always on my mind

We hold on tight
Wrapped up just you and I
While the moon looks full of red
It's the pull, keeps us moving straight ahead
Two Bs can change
The motions still same
But my wings won't open wide
While the bug stays on my mind

It's always on my mind
It's just always on my mind
It's just always on my mind

Bit me in the nighttime
In the nighttime it's the first time
That we slept in the same bed but I got

Bit me in the nighttime
In the nighttime it's the first time
That we slept in the same bed but I got
