

Prepare for War

Cryonic Temple

I wake up feel all the heat
Prepare for war, and pray for my soul
March to the front, see the enemies' eyes
We all stand tall, willing to die

Now it's time, take that step
Leave your fears all behind
Raise your sword, follow me into war

We will fight 'til the end, take our land back again
From the masses of hell, we will raise again
We will fight 'til the end, take our land back again
From the masses of hell, we will raise again

Now we stand, we defeated them all
From this moment on, it will be our home
More will come to claim the land
But be prepared, we'll never give in

Now it's time, take that step
Leave your fears all behind
Raise your sword, follow me into war

We will fight 'til the end, take our land back again
From the masses of hell, we will raise again
We will fight 'til the end, take our land back again
From the masses of hell, we will raise again

Now it's time, take that step
Leave your fears all behind
Raise your sword, follow me into war

We will fight 'til the end, take our land back again
From the masses of hell, we will raise again
We will fight 'til the end, take our land back again
From the masses of hell, we will raise again
