

Out there, in outer space
Nothing but darkness surrounding me
Thinking of you, even in my dreams
So close to me, yet so far away

All I hear are silent screams
Feeling of fear is consuming me
All I got, is dream and hope
Thinking of you every step that I take

Silence, crying for you
Darkness, (is) coming to me

You are closer to me than you were before,
But still you are out of my reach
A 1000 years, the distance is blinding me
Will I ever see you again?

You are the only star in the universe
I see you fall for me every night
A starchild for me too look upon
A starchild, too far away

You are always here, in my heart
Fighting for reason, containing the truth
with every fight, I feel closer to you
But you are hiding behind all the stars

I know you are there, lost in space
Hoping for rescue, blaming on me
You can't ignore what i said
I promise that I will save you one day

Silence, crying for you
Darkness, (is) coming to me

You are closer to me than you were before,
But still you are out of my reach
A 1000 years, the distance is blinding me
Will I ever see you again?

You are the only star in the universe
I see you fall for me every night
A starchild for me too look upon
A starchild, too far away

You are closer to me than you were before,
But still you are out of my reach
A 1000 years, the distance is blinding me
Will I ever see you again?

You are the only star in the universe
I see you fall for me every night
A starchild for me too look upon
A starchild, too far away
