

Through The Storm

Cryonic Temple

Congratulations, you made it through the storm
Most people are so ungrateful for life and don't know
Why they got lost in the storm
But you won it all with the eye on the prize

Never never die

There is the price to pay to stay alive
The pain we feel as we slowly die inside
These tears for those that was left behind
The life we chose to live to stay alive

As we fall through the eons of life
We need to stand up and fight

We will make it through the storm (through the storm)
I will never ever let you fall down
Even when the world keeps spinning around (spinning around)
We will make it through the storm

These desires from the burning hearts
To do what's right no matter what the cost
"Hold me now," she said in the pouring rain
"I feel so lost in life without you here."

As we fall through the eons of life
We need to stand up and fight

We will make it through the storm (through the storm)
I will never ever let you fall down
Even when the world keeps spinning around (spinning around)
We will make it through the storm
