

# Breakout

Cryoshell

Who are they to patronize?  
Who is gonna sympathize? Come on  
Cries are caving in the skies  
Walls prepare to paralyze the pain

Machines begin to mobilize  
A systematic override, come on  
The temperature begins to rise  
Impossible to feel

Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear  
Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear

I scout for phantoms in the night  
The mercy game of wrong and right, come on  
I calculate the sound of fright  
Someone's gonna pay

Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear  
Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear

(Who are they to patronize?)  
(Who is gonna sympathize?)

Away  
Break away, break away, break away  
Away  
Break away, break away, break away

Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear  
Break out (away)  
Acceleration of fear  
Break out (break away, break away)  
From screams that no one can hear  
Break out
