

Through fire, through darkness
Forever and a lifetime
These ripples grow bigger
Absorbed in spiral light years

This one in a million
Of circles defines a moment
And lasting through ages
Worlds rising and you're the trigger

You'll light the day
You'll turn it inside out (Differences collide)
And when you find your strength (Find your strength)
Then all your feelings of doubt will disappear
It's time

Still breathing, so easy
Evolving, we choose to step out
Forgotten, that's over
Let it all out

You'll light the day
You'll turn it inside out (Differences collide)
And when you find your strength (Find your strength)
Then all your feelings of doubt will disappear
It's time

And though you walk on empty streets
Who will find you? Who will meet?
You with all your hopes to give
And believe that you will be
This one in a million

You light the day
You find your strength

You'll light the day
You'll turn it inside out (Differences collide)
And when you find your strength (Find your strength)
Then all your feelings of doubt will disappear
It's time
