

# Obeisant

Cryptopsy

You've always taken such good care of me  
Is there any way you can get this done?  
The bitch doesn't stop  
The bitch doesn't stop

She's fucking relentless, continuously attacking  
It's simply exhausting, never-ending assault  
I need to get away from this, I've tried everything  
But nothing seems to work, I'm trapped in this man-made hell

Another message, another threat  
Another notification, a constant, incessant swarm  
Spiraling around this void  
I could disconnect, but what fun would that be?

Just another hopeless day

The man told you what would happen, you have to believe him  
There is only one solution, it must be done

It's time to kill, it's time to kill  
It's time to kill, it's time to kill

You've always protected me, kept me safe from harm  
Now do the right thing and kill these motherfuckers

It is us or them  
Them or us  
Tonight's the night, do you have everything as we discussed?  
Make sure to do it properly, forget the baby behind  
Leave crawling in their waste  
It is nothing compared to what they've done to me

The flashing lights are approaching  
How dare you name me? I told you exactly what to say  
But you didn't listen, you worthless piss  
I hope you gag and die  
That is something I'd love to witness
