

# Make My Day

Crystal Ball

The job is done the battle won  
My troubles overcome  
I chase the world with flags unfurled into the setting sun  
With spirits high and crimson sky and shadows all around  
Couldn't have known that just heading home lead me to sacred ground

No way could I see all the joy that you'd bring home to me

Life is a song  
Since you came along  
Deciding to stay  
Now you make my day  
I'm never alone  
Whenever I'm home  
So happy to say  
That you make my day

Been far and wide nowhere to hide  
Always on the run  
Wasting my mind on cheap tasting wine  
Thinking it was fun  
I never knew there could be you waiting in the wings  
There's so much to give and so much to live and other precious things

No way could I know that you'd cure all my sorrow  
No way could I see all the joy that you'd bring home to me

Life is a song  
Since you came along  
Deciding to stay  
Now you make my day  
I'm never alone  
Whenever I'm home  
So happy to say  
That you make my day
