

## Sun Came Out

Crystal Ball

Locked in my darkness  
With visions of demons in my mind  
A world full of blackness  
Making light hard to find

Was so close to madness  
Chasing those ghosts around  
Just fighting my sadness  
Feeling that help can't be found

And then the sun came out  
Sun came out - Driving the clouds away  
Sun came out - Yeah the sun came out  
Then the sun came  
Turning my nightmare into day  
Then the sun came out

Shrouded in blindness  
Forced to believe the chips were down  
With no sign of kindness  
And silence the only sound

Was so close to madness  
Chasing those ghosts around  
Just fighting my sadness  
Feeling that help can't be found

And then the sun came out  
Sun came out - Driving the clouds away  
Sun came out - Yeah the sun came out  
Then the sun came  
Turning my nightmare into day  
Then the sun came out

Don't go under  
When rain and thunder  
Seek to plunder  
The sunshine from your life
