

The Moondog

Crystal Fighters

I saw the future and I see it all around
Cause the past is the present and the future is now
I saw a star and it took me through the clouds
Where the sound is the color and color is the sound

But I never thought I'd be missing you
I just want you to be free and true
Tired of all the things that we used to do
I just want you to be free and true

Find the star in the North East sky
That you can't stop watching and you don't know why
Close your eyes just let it all go
And the next thing you know you'll be on this shore

And I never thought I'd be here with you
Now just do whatever it is you want to

Whatever happens to me or you
Look up to our star and drift away
Whatever happens to me or you
You can look up to the blue and drift away

And I never thought I'd be here with you
Now just do whatever it is you want to
See our star it burns so free and true
Now just do whatever it is you want to

And now we have to name our star
Before we're drifting worlds apart
Now go go go
You're on your own

Passed on to the land of the distant star
What he'd do to be alive and to hold her hand
Remembering the look in her eye lying heart
To heart in the sand
In love on the beach of our star

Whatever happens to me or you
Look up to our star and drift away
Whatever happens to me or you
You can look up to the blue and drift away

Whatever happens to me or you
Look up to our star and drift away
Whatever happens to me or you
You can look up to the blue and drift away

Whatever happens to me or you
Look up to our star and drift away
Whatever happens to me or you
You can look up to the blue and drift away

Whatever happens to me or you
Look up to our star and drift away
Whatever happens to me or you

You can look up to the blue and drift away
