

Tranquilo

Crystal Fighters

Baby keep it tranquilo
Though I know it ain't easy
But I know if it's meant to be
Honey love will find a reason
Baby keep it tranquilo
Though I know it ain't easy
But I know if its meant to be
Honey love will find a way

Tranquillamente
I'm counting my blessings
Though the distance distressing
Between me and you now

I like to be calm like the palm trees
That sway in the warm breeze
While I wait for the deep freeze
Three thousand miles from you

Baby keep it tranquilo
Though I know it ain't easy
But I know if it's meant to be
Honey love will find a reason
Baby keep it tranquilo
Though I know it ain't easy
But I know if its meant to be
Honey love will find a way

Absolutamente, your absence brings me magic
You're halfway 'cross the planet
But I only dream of you yeah
Gotta be calm when it's hurricanes
Braving storms of this loneliness
With the promise of your kisses
Til I'm floating there with you again

We went so high above this world
I could not look down

Baby keep it tranquilo
Though I know it ain't easy
But I know if it's meant to be
Honey love will find a reason
Baby keep it tranquilo
Though I know it ain't easy
But I know if its meant to be
Honey love will find a way

If it's meant to be, it's meant to be
It's meant to be, yeah
If it's meant to be, it's meant to be
It's meant to be, yeah

Baby keep it calm, no it won't be long
Baby keep it tranquilo
Baby keep it calm, no it won't be long
Baby keep it tranquilo

If it's meant to be, it's meant to be
It's meant to be, yeah
If it's meant to be, it's meant to be
It's meant to be, yeah

Baby keep it tranquilo
Though I know it ain't easy
But I know if it's meant to be
Honey love will find a reason
Baby keep it tranquilo
Though I know it ain't easy
But I know if its meant to be
Honey love will find a way

Baby, keep it calm, no, it won't be long
Baby, keep it tranquilo
If it's meant to be, it's meant to be
It's meant to be, yeah
Baby, keep it calm, no, it won't be long
Baby, keep it tranquilo
If it's meant to be, it's meant to be
It's meant to be, yeah
