

Me Against The Night

Crystal Gayle

Moon, please don't shine on me
Help me hide his memory
Stars, don't light the midnight skies
Cos you don't wanna see me cry

Heart, don't let me think of him
Lock your door, don't let his memory in
I feel the cold wind blowing through
A love like this was meant for two

But it's me against the night
And I'm afraid it's a losing fight
I see you in every shadow of the room
You're not here to hold me tight
I can't wait til the morning light
There's no way to win
When it's me against the night

Gone, you said you'd never be
And I let you belong with me
Burning tears fall down like rain
Longing for your love again

But it's me against the night
And I'm afraid it's a losing fight
I see you in every shadow of the room
You're not here to hold me tight
I can't wait til the morning light
There's no way to win
When it's me against the night
Me against the night
