

# Nobody Wants To Be Alone

Crystal Gayle

I've spent my life trying to tell everyone  
I've got myself, I don't need anyone  
You heard the words but you looked in my eyes  
And saw the wall of tears I was hiding behind

You reached for me, I felt your touch  
I wanted you, we both needed so much  
In a world of lonely people looking for love  
Why was I surprised to see it happen to us?

Everybody needs someone to love  
Everybody wants to love someone  
When the nights are long and cold  
Everybody needs someone to love  
Nobody wants to be alone

The days were empty, the nights were so long  
I wished on every star 'til you came along  
I knew that one day you'd walk through that door  
Sometimes, it's hard but love is worth waiting for

Everybody needs someone to love  
Everybody wants to love someone  
When the nights are long and cold  
Everybody needs someone to love  
Nobody wants to be alone

Now, when you see me cry  
You'll only see tears of joy in my eyes  
In a world of lonely people looking for love  
I wish everyone could be as lucky as us

Everybody needs someone to love  
Everybody wants to love someone  
When the nights are long and cold  
Everybody needs someone to love  
Nobody wants to be alone
