

We made from nothing
So take it away
Take it away again
Take it away

Taking over earth and beyond the skies
Show me a sign you down to ride?
For progression
We stay alive 'cause we need the pain
For progression
I want it all space time in sync
Life intertwines my desires in sonic speed
So we lift from the ground
Blasting off much higher and higher we go

You'll never take me under
Never gonna take me under

Broken down
This burden was mine
'Cause gravity holds nothing refined
Now forever
We'll live forever
I want it all there's more to this

You'll never take me under
Never gonna take me under
Now we're falling down to nowhere

The universe ain't big enough for all of us
Open the sky
This universe was not big enough for us
Open the sky

Taste of our past left in their future
View from the sky
I'm the rainmaker
This odyssey got me lit
'Cause I'm getting fired up in commotion
It's true
See beyond what you're suppose to
Choose to see what I see
You won't dare to deny it

Who is ever going to find me?
When gravity breaks away

Who ever knew we'd go where gravity breaks away
Now we've reached beyond where gravity fades away

You'll never take me under
Never gonna take me under
Now we're falling down to nowhere
