

Still Alive

Crystal Viper

Danger is around us, but can't be seen
There is nothing left, but your fear
Total confusion, we've lived in lies
Time is no longer running out

Let the thunder strike the sky
Here I'm standing between lightning, still alive
In the triangle, where's no life
I am drowning in the rain, but still alive
I won't die

Its secret powers lie in wait for me
Being here means I'll disappear
No laws of physics, no nature's rules
Who enter this place is a fool

Let the thunder strike the sky
Here I'm standing between lightning, still alive
In the triangle, where's no life
I am drowning in the rain, but still alive
I won't die

Let the thunder strike the sky
Here I'm standing between lightning, still alive
In the triangle, where's no life
I am drowning in the rain, but still alive
Let the thunder strike the sky
Here I'm standing between lightning, still alive
In the triangle, where's no life
I am drowning in the rain, but still alive
I won't die
