

Whenever I close my eyes  
Your face is printed in my mind  
I hate to be gone  
And I can't wait to go back home  
I get insecure, I get all confused  
But when I see you it's all good  
No I don't like myself with anybody else  
It's all part of our love spell

Where is my sweetheart, my honey?  
Keeping all the light in the dark  
So sunny  
Where is my sweetheart, my honey?  
Keeping all the light in the dark  
So sunny  
You can turn me on and I will never turn on you  
You can turn me on and I will never turn on you

I go through my journals  
And your name is mentioned so tenderly  
I wanna lay in your bed  
To wake up with the smell of your hair  
All over my face, with your love embrace  
I made this song only to let you shine  
When can we be jointed through the hips?  
You bring the honey and I'll bring the heat

I wonder when I'm going to see you again  
I wonder when I'm going to feel you...  
Oh, it's not fair

Where is my sweetheart, my honey?  
Keeping all the light in the dark  
So sunny  
Where is my sweetheart, my honey?  
Keeping all the light in the dark  
So sunny  
You can turn me on and I will never turn on you  
You can turn me on and I will never turn on you  
You can turn me on and I will never turn on you  
You can turn me on and I will never turn on you
