I Love You

CSS

Feel the beat of my heart

I love you, I love you too
I love you, I love you too
I love you, I love you too
I love you, I love you too

Oh my God it happened again
Another year has passed and here I stand
Table for one is really no fun
So I'll eat it here in front of the TV

So many people come and go
If you look around you'll see the flow
How can it happen just like this
A knock on my door and love can find me

I love you, I love you too
I love you, I love you too
I love you, I love you too
I love you, I love you too

I thought I was a traffic light
You always see me there but never realize
And like a car crash you change my scene
You bumped into me and now my light is always green
So many people come and go
If you look around you'll see the flow
How come out of a millions sticks is you that I picked?
How come out of a millions sticks is only you and me?
How come out of a millions sticks is you that I picked?
How come out of a millions sticks is only you and me?

Feel the beat of my heart
Feel the beat of our bodies bouncin' in the dark
Feel the beat of my heart

The rain is falling on my heart
Bringing thoughts I've never had
Like love and shit
Like the only thing that really hits
Fix me with a kiss boy
Can you fix me with what I really need
Fix me with a kiss boy
The rain is falling on my head
Bringing thoughts I've never had
Like love and shit
Like the only thing that really hits

Fix me with a kiss boy
Can you fix me with what I really need?
Fix me with a kiss boy
Can you fix me with what I really need?
