

# Into The Sun

CSS

The Eastern night  
Thought it was bright  
Where the sun rises  
Under the light  
It was such a sight  
But it was just fluorescent high rises

I got so blue  
It wasn't true  
Electric light  
Shines down on you

Driving away, into the sea  
I'm going west, you can't stop me  
Leaving alone  
Starting a new day  
(Leaving alone, leaving alone)  
Driving away, into the sun  
I'm looking forward, fuck everyone  
Leaving alone  
Starting a new day  
(Into the sun, into the sun)

Picked up a creep  
Out on the street  
Going my way  
The tires turn  
The time it burns  
No way for this moment to stay

The western day  
I crossed the bay  
Into a vision  
Under the sky  
I felt so high  
But it was just a decision

The sun it sets  
The diving jets  
Another day  
Won't look the same to me

Driving away, into the sea  
I'm going west, you can't stop me  
Leaving alone  
Starting a new day  
(Leaving alone, leaving alone)  
Driving away, into the sun  
I'm looking forward, fuck everyone  
Leaving alone  
Starting a new day  
(Into the sun, into the sun)

Driving away, into the sea  
I'm going west, you can't stop me  
Leaving alone  
Starting a new day

(Leaving alone, leaving alone)  
Driving away, into the sun  
I'm looking forward, fuck everyone  
Leaving alone  
Starting a new day  
(Into the sun, into the sun)
