

## Closer

Cuco

Now that you're gone, I wish you well

(Wish you well)

When I get lost I can not tell

(I can't tell)

If it's too much, then close your eyes

(Close your eyes)

You say my name, I get hypnotized

(Hypnotized)

I can show you where to go, go

Are you getting closer, getting closer, getting closer baby

I'll be someone that you know, know

Are you getting closer, getting closer, getting closer baby

You could be bluffin', or we could be nothin'

Did you mean what you said on the phone

One day we're somethin', now we're both runnin'

You gotta let it burn

Feeling like I could lose control

Looking around to find my soul

So is there somebody, are they always watching?

I look in the mirror just to find a ghost

I can show you where to go, go

Are you getting closer, getting closer, getting closer baby

I'll be someone that you know, know

Are you getting closer, getting closer, getting closer baby

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

Didn't you know, didn't you know

I can show you where to go, go

Are you getting closer, getting closer, getting closer baby

I'll be someone that you know, know

Are you getting closer, getting closer, getting closer baby
