

Walked into the aisles of our lonely lives  
Lift our idleness thinking will we die sometime  
Who will sing and make our dreams wake up tonight  
For a no no wasteland came into the light

I know that you're waiting for me  
No girl, this ain't make-believe  
I know that you're waiting for me  
No girl, this ain't make-believe

Let me think a moment for the second time  
Stay inside while I find past still very blind  
Left me somewhere sitting patient still right mind  
Brightness into always sun shines bright as skies

I know that you're waiting for me  
No girl, this ain't make-believe  
I know that you're waiting for me  
No girl, this ain't make-believe

I know that you're waiting for me  
No girl, this ain't make-believe  
I know that you're waiting for me  
No girl, this ain't make-believe
