

Damage

Cueshe

I made my mistakes, put a tear on your face
Over and over, again and again
Those words that I've said
Was meant for you but I broke 'em in two

'Cause I wanna hold like we used to before
But I just can't hold when your love means no more
Because the damage was done

Find your way back home, find your way
'Cause I'll be here for you, I'm here for you
Don't ever want you gone away

These regrets we're place, may we don't have to face
So we can get over this crazy uphill
Tell me what does it take, to bring a smile on your face
I wanna grow old with you till the end

'Cause I wanna hold like we used to before
But I just can't hold when your love means no more
Because the damage was done

Find your way back home, find your way
'Cause I'll be here for you, I'm here for you
Don't ever want you gone away
