

I Won't Let You Down

Cueshe

I know I made mistakes
I know I let you down
This time I'm here with you
Let's give it one more try
'Cause God knows I've changed

And now that you're back
I've been waiting for this chance
A chance to win you back
To win you back somehow
This time it will be right

Now that you're here
Nothing's gonna break us now
This time I won't let you down

Now that you're here
Nothing's gonna break us now
This time I won't let you down

Now everything has changed
Everything's in place
Everything's so right
Everything's just perfect
This time it will be right

Now that you're here
Nothing's gonna break us now
This time I won't let you down

Now that you're here
Nothing's gonna break us now
This time I won't let you down

I've seen the way you've hurt
Somehow I feel the pain
That's why I'm coming back
To take it all away
And I will lift you up

Now that you're here
Nothing's gonna break us now
This time I won't let you down

Now that you're here
Nothing's gonna break us now
This time I won't let you down
This time I won't let you
I won't let you
I won't let you down
