

All the lights in town  
Are dimmer without you around  
I can't hear a sound  
The colors wash away from green to brown  
I walk you through the crowd  
And if they still can't see  
Well, I don't care  
I don't care

In love, we know that we'll live forever  
And shine eternally

Deeper shades of night  
And summer days, they burn too bright  
Write another line  
And I can make believe that I don't care  
I don't care

In love, we know that we'll live forever  
And shine eternally

To the ghosts  
The start and the end are so close  
To the ghosts  
We're here for a moment at most

In love, we know that we'll live forever  
And shine eternally  
In love, we know that we'll live forever  
And shine eternally
