

Trials

Cults

I met a stranger in your skin
With the same eyes
I know you

With words
He had a way just like you too
Where'd you go?
I know you

I know you
I know you
I know you

Even when I'm sleeping
Even when I dream at night
You come to me
Turning down the light
'Til you're the only thing I see

Even when I'm sleeping
Even when I dream at night
You come to me
You're turning down the light
'Til you're the only thing I see

Look back
At what you could've been
Every day that
I know you

Held on
But then you strayed so far from view
Couldn't say
I know you

I know you
I know you
I know you

Even when I'm sleeping
Even when I dream at night
You come to me
You're turning down the light
'Til you're the only thing I see

Even when I'm sleeping
Even when I dream at night
You come to me

You're turning down the light
'Til you're the only thing I see

I know you
