

When to Talk and When to Listen

Current Swell

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way

Don't listen when they say that you're lucky in love
Don't let them make you think that it's sent from above
Cause when you're ready, yeah it's gonna find you
It's gonna find you when you're ready to take it
I thought I taught you now to have a little patience
I can't believe it, I can't believe I'm down on my knees, yeah

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way

I think you love me that way

I think you love me that way

Let him take you by the hips, take you out on the floor
Down on my knees, you got me down on my knees
Cause you can listen to what they say
The repetition that you heard before
Just get a bit of backbone, lose a little vanity
A bit of backbone, lose a little vanity
I can't believe it, I can't believe I'm down on my knees, yeah

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way

When to talk and when to listen
When to go and when to stay
How to love without condition
I think you love me that way
