

# Better Days

currents

Do you ever want to waste away  
Recounting better times?  
I'm with you  
Is this all we have left to live with?  
I only wanna get by  
So with that, I don't mind  
Getting by  
Reliving moments lived till my last breath

Do you get it?  
Suffocating, can't breathe but you've got a fucking mouth to feed  
Never made the effort to change or go out of our way

You follow your sorrows  
For better days we've waited for how long  
How long?  
You follow your sorrows  
We spiral downward endlessly  
But is the bottom where we're meant to be?

Is anybody listening?  
Can anybody tell me  
Why I can't get up?  
Why can't I get up?  
Down on my knees as the world comes falling down  
My fear: chained to the ground  
For my will is weak  
And my state is bleak

But I'm bound to break free  
Pride running through my veins  
My chains lay flat around me  
My chains lay flat around me

How long  
Do we endure the pain?  
How long  
'Till we accept

You follow your sorrows  
For better days we've waited for how long  
How long?  
You follow your sorrows  
We spiral downward endlessly  
But is the bottom where we're meant to be?

This isn't where we're meant to be  
We spiral endlessly

You follow your sorrows  
For better days we've waited for how long  
How long?  
You follow your sorrows  
We spiral downward endlessly  
But is the bottom where we're meant to be?
