

Better Off

Curtis Grimes

Sometimes we think if it was over
Maybe we'd be better off
But every time we see that red light
We just can't bring ourselves to stop

Because that dress is better off, the bottle's better open
And the lights are better down and baby I was hoping
We could get back to the basics, we'd be so much better off

You and I have choices
To take one road or two
And I think we made the right one
And I think right now's the proof

Because that dress is better off, the bottle's better open
And the lights are better down and baby I was hoping
We could get back to the basics, hit a couple base hits
Who knows we might just make it home
And my shirt is better off, thrown across the room
And it's so much better knowing, there's still a me and you
I say if we stay together baby, we'd be so much better off

'Cause I believe the best is yet to come
And you and me is something to keep

And 'cause that phone is better off, the world is best turned down
When the doors are closed behind us and no one is around
We could get back to the basics, hit a couple base hits
Who knows we might just make it home
And my shirt is better off, thrown across the room
And it's so much better knowing, there's still a me and you
I say if we stay together baby, we'd be so much better off

So much better off
