

# Rain

Curtis Grimes

Those gray storm clouds up in that sky  
Have never been too good on this old heart of mine  
But today I see them in a different light  
When I'm laying in bed with you by my side  
Most days I would be lonely and blue  
But this morning I woke up lying next to you  
With your soft broken voice and your morning hair  
The way you're smiling at me I can't help but stare

Baby let's lay and listen to the rain fall down while our heart  
s pound  
This feeling I get when I'm by your side, girl it drives me wil  
d  
Tell me everything that you want me to do, so I can take care o  
f you  
That thunder just keeps rolling on  
As that rain plays us a love song

We both have a lot of things we gotta do  
But today let's make it about me and you  
I know you've got a lot on your mind  
So take a second honey to let yourself unwind  
'Cause there ain't nothing can't be put on hold  
And let's light up a candle just to watch it glow  
The only thing better than the sun's golden rays  
Is you leaning in to my ear to say

Hey baby let's lay and listen to the rain fall down while our h  
earts pound  
This feeling I get when I'm by your side, girl it drives me wil  
d  
Tell me everything that you want me to do, so I can take care o  
f you  
That thunder just keeps rolling on  
As that rain plays us a love song

I know the sun will be back tomorrow  
But until those storm clouds blow away

Baby let's lay and listen to the rain fall down while our heart  
s pound  
This feeling I get when I'm by your side, girl it drives me wil  
d  
Tell me everything that you want me to do, so I can take care o  
f you  
That thunder just keeps rolling on  
As that rain plays us a love song  
As that rain plays another love song

All night long  
Our love is strong
