

Need My Baby

Curtis Harding

"My world was dark but you brought me to the light"

I get so tired of heart ache and stress
So I reach out to you for your tenderness
Cause you got that something that it's all about
And now that you're here I can't live without

My world is brighter when I'm with you
It takes me away
Without your light girl what would I do
I need my baby

The world can be so cold beating you down
You try to reach higher you're back on the ground
But it's never over and I'm never through
Cause I got you baby and I'm so into

My world is brighter when I'm with you
It takes me away
Without your light girl what would I do
I need my baby

My world is brighter when I'm with you
It takes me away (I'm gone so far)
Without your light girl what would I do
I need my baby (I need my baby)

"From darkness to the light"

I need my baby
You brighten my life girl
I need my baby
From darkness to light girl
I need my baby
You make it alright girl
I need my baby
You brighten my life girl
I need my baby
