

Reason for Our Love

Curtis Stigers

Caught in the middle
Of a daydream of you
We're lost in this riddle
Where they keep the answers up above

There's a reason for our love
There's a reason for our love

Thought life held nothing
Now I'm holding your hand
My heart always wondering
When all at once it understands

There's a reason for our love
There's a reason for our love

Funny how it seems so surprised
Though it has been right before our eyes
All the time

While we were talking
Time has flown so it seems
That you were sleepwalking
Through that very same dream and back to us

There's a reason for our love
There's a reason for our love

Though the answer lies above
There's a reason for our love
