

# I'll Never Make It

Cut Worms

I'll never make it  
My eyes can't see without you  
I'll never make it  
My mind can't think without you  
Somebody else could say all these things  
Well, that's true...  
But they just never could mean 'em  
The way that I do

Say they want a true love  
But they don't  
Say they'll always be there by your side  
But they won't  
Yeah you know they were always gonna leave you  
All alone  
My love won't stay  
My love won't go away

What's happening to me?  
What's happening to me?

When you're broken in two  
Lost in what you can't do  
Stay alive my baby  
My love will find you  
Oh... and you only

I'll never make it  
My touch can't feel without you  
I'll never make it  
My life's not real without you  
Somebody else could say all these things  
Well, that's true...  
But they just can't understand it  
The way that I do

Say they want a true love  
But they don't  
Say they'll always be there by your side  
But they won't  
Yeah you know they were always gonna leave you  
All alone  
My love won't stay  
My love won't go away

What's happening to me?  
What's happening to me?

When you're broken in two  
Lost in what you can't do  
Stay alive my baby  
True love will find you  
Oh... and you only
