

It Won't Be Too Long

Cut Worms

I love the way that you walk
Things that you talk about
All these things in our mind
Well I know in due time they work themselves out

'Cause I know it don't have to be this way
Even though I sometimes don't know what to say
Don't know but it won't be always in misery
I know it's hard but let it go by

I know it won't be too long before we're free
I know it won't be too long before we're free

And I wish I could dance to the rhythm that moves you
Wish I could prove how I feel
But there's things I can't change
Everything is so strange
And nothing's real

But I know it don't have to be this way
Even though sometimes I don't know what to say
Don't know but it won't be always in misery
I know we can let it all go by

I know it won't be too long before we're free
I know it won't be too long before we're free
