

# Forever

Cyhra

Just beyond the end of time  
In a world that's yet to come  
After we have lived a thousand lives  
You and I might meet again  
Innocent and unafraid  
Feel the love that time I will survive

Once unspoken pain then will disappear  
Maybe someday far from here

Till forever, till the last tear has finally fallen down  
Love will find us in a brand new life  
Till forever, time for our heart to heal  
I'll be waiting on the other side

People pass me on the street  
As another day goes by  
Sea of strangers on the borderline

My confession, it shattered as worlds collide  
Unforgiven, undefined

Till forever, till the last tear has finally fallen down  
Love will find us in a brand new life  
Till forever, time for our heart to heal  
I'll be waiting on the other side

And now the shadows  
The start of a lonely night  
Why would I need you by my side
