

Night Life

Cyndi Lauper

When the evening sun goes down
You will find me hanging around

The night life, it ain't no good life
But it's my life

And many people just like me
Dreaming of old used-to-be's

And the night life, it ain't no good life
But it's my life

Listen to the blues they're playing
And listen what the blues are saying
Mine is just another scene
From the world of broken dreams

And the night life, it ain't no good life
But it's my life

Mine is just another scene
From world of broken dreams

And the night life, it ain't no good life
But it's my life
And the night life, it ain't no good life
But it's my life
