D-Block Europe

GrusPro in your speakers  
Skr, skr  
Skr, skr, skrrr

Yeah  
I remember  
Very cold December  
Trapping out at Brenda's  
No school attendance  
Buj up in the blender  
Ten turn on the pressure  
If you love me the way you say you do  
Then you wouldn't behave the way you do  
So much pressure we still remain in cool  
Told my darling let's fly out somewhere just me and you

Yeah  
I sip lean but still gotta tell the kids it ain't cool  
Westwood wanna interview, me and bro were in Jupiter  
She said, "If I take you back, after all of this I'm a fool"  
Now she rock a Rolly with the ice bezel looking stupider  
I told my fiends the worker's new he does not know the rules  
I need a full report if he falls asleep or move stupid-ah  
I feel depressed sometimes I do not know what to do  
Flashbacks, me and Wasp were in the ride lurking tryna boot 'em up

Yeah  
I remember  
Very cold December  
Trapping out at Brenda's  
No school attendance  
Buj up in the blender  
Ten turn on the pressure  
If you love me the way you say you do  
Then you wouldn't behave the way you do  
So much pressure we still remain in cool  
Told my darling let's fly out somewhere just me and you

Yeah  
It's me and you and we just swervin' round  
I can tell you're sceptical, it took a lot to let me get next to you but we  
learning now  
Gelato 41, we burning out  
Remember when you hit me, said Jakes are here uncle they are searchin' now  
I got tattoos on my face, put the pussy on my smile  
Lost child, I might drown  
Tend to be there for a while  
20 minutes and it's like the river Nile  
We can plan the future living in for now

Yeah  
I remember  
Very cold December  
Trapping out at Brenda's  
No school attendance  
Buj up in the blender  
Ten turn on the pressure

If you love me the way you say you do  
Then you wouldn't behave the way you do  
So much pressure we still remain in cool  
Told my darling let's fly out somewhere just me and you
